PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in exploratory data analysis, business intelligence, and data pipeline development. Proficient in Python, SQL, and Power BI to extract actionable insights, build interactive dashboards, and support data-driven decision-making. Skilled in cross-functional collaboration, stakeholder management, and translating complex datasets into clear business recommendations.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), HTML, CSS

Databases & SQL: MySQL, MS SQL (joins, window functions, subqueries, query optimization)

Data Visualization & BI: Power BI, MS Excel (Pivot Tables, Power Query, Advanced Formulas, Data Modeling)

Machine Learning & Statistics: Supervised/Unsupervised Learning, CNNs, EDA, Hyperparameter Tuning, A/B Testing

Product & Domain: Growth Analysis, Data Cleansing, KPI Tracking, Roadmap Planning, Stakeholder Management

Languages: English (Professional), Bengali (Native), Hindi (Professional)

PROFESSIONAL EXPERIENCE

QUICKOO Solutions | Data Analyst & Product Manager

Jul 2025 – Present

- Performed exploratory data analysis (EDA) on 100K+ customer records using Python (Pandas) to identify churn indicators, enabling targeted retention strategies that improved customer retention by ~18%.
- Designed and deployed 3+ interactive Power BI dashboards tracking Daily Active Users (DAU), feature conversion rates, and regional KPIs, reducing manual reporting time by 5+ hours per week.
- Optimized 20+ complex SQL queries for automated ETL pipelines and executive reporting, improving data extraction speed by ~30%.
- Collaborated with cross-functional teams to translate business requirements into data models and actionable insights, supporting product roadmap decisions.

KEY PROJECTS

Walmart Sales Data Analysis | MySQL, Python, Excel

- Analyzed 500K+ transactional records using advanced MySQL window functions, CTEs, and joins to identify top-performing branches and seasonal demand trends.
- Uncovered statistical correlations between demographic profiles, purchase timings, and net margins, delivering insights that informed regional marketing strategy.

Blinkit Sales & Business Analysis | Power BI, Power Query, Excel

- Architected a 5-page Power BI dashboard covering retail sales metrics, delivery performance, and regional margin analysis, improving stakeholder reporting efficiency.
- Engineered a star-schema data warehouse model from raw retail datasets, cutting query load time by ~40% and improving report refresh speed.

Brain Tumor Detection CNN Web App | Python, TensorFlow, Flask

- Built and trained a CNN (TensorFlow/Keras) achieving 92%+ accuracy on binary classification of brain MRI images across a 3,000-image dataset.
- Deployed the model via a Flask web application delivering real-time diagnostic confidence scores, demonstrating end-to-end ML pipeline development.

EDUCATION

Swami Vivekananda University | B.Tech in Computer Science & Engineering | Kolkata, India 2021 – 2025 | CGPA: 8.25 / 10

Relevant Coursework: Database Management Systems (DBMS), Data Structures & Algorithms, Machine Learning Foundations, Statistics

CERTIFICATIONS

- [Intellipaat SQL Certification](#) — Advanced database queries, subqueries, transactional schemas, query optimization
- [Professional Data Analytics Certification](#) — Statistical analysis, data modeling, exploratory data analysis
- [Professional Data Science & ML Certification](#) — ML architectures, classification algorithms, hyperparameter tuning
